

" "

The crossword puzzle grid is 10 rows by 10 columns. The top-left cell (row 1, column 1) contains a photograph of a black and white cow's head. The rest of the grid is a grid of squares with some containing letters and symbols. The symbols include apostrophes (') and dashes (-) placed at the start of words, indicating the direction of the word. For example, in row 1, column 2, there is a dash and an apostrophe, indicating a word starting there. The grid is partially filled with letters and symbols, but many cells are empty.
