

" "

The image shows a 10x10 grid for a word search puzzle. The top-left corner (approximately the first 3 rows and 3 columns) contains a photograph of several green watermelons, one of which is cut open to show its red, seeded interior. The rest of the grid is filled with various symbols: dots, slashes, and arrows. These symbols are placed in specific grid cells or between cells to indicate the direction of the words to be found. For example, a dot in a cell might indicate a word starting there, while a slash with an arrow pointing right indicates a word extending horizontally from that cell. The symbols are scattered throughout the grid, providing clues for the solver.
