The image shows a word search puzzle on a grid. On the left side, there is a photograph of four cheetahs. The grid is composed of 10 columns and 10 rows. The top-left corner of the grid is occupied by the cheetah image. The remaining cells of the grid contain patterns of dots and arrows, which serve as clues for the words to be found. The arrows indicate the direction of the words: horizontal, vertical, or diagonal. The dots represent the letters of the words, with some cells containing multiple dots to indicate overlapping letters or specific letter counts.
