

" "

The image shows a 10x10 grid puzzle. The top-left cell (row 1, column 1) contains a photograph of a polo player on a brown horse. The rest of the grid is composed of white cells with black dots and arrows. The arrows indicate the direction of the scan for each cell: up, down, left, right, or a combination (e.g., up-right, down-left). The dots are arranged in various patterns, including horizontal lines, vertical lines, and clusters, which are used to identify words or phrases within the grid.
