The image shows a word search puzzle on a grid. The top-left corner of the grid is replaced by a photograph of a theater interior with rows of red seats. The grid itself is composed of 12 columns and 15 rows. Various symbols are placed within the grid cells to indicate the direction of words: arrows pointing up, down, left, or right, and dots. The number '36' is located in the 10th row, 11th column. The puzzle is designed for a user to find words based on these directional cues.
