"

The image shows a word search puzzle on a grid. On the left side, there is a photograph of a Red-backed Shrike perched on a branch. The grid is composed of 12 columns and 12 rows. The top-left cell of the grid is occupied by the bird image. The remaining cells are white with black grid lines. Small black arrows are placed in various cells, pointing in different directions (up, down, left, right, and diagonally) to indicate the starting points and directions for finding words. The arrows are distributed across the grid, with some pointing towards the center and others pointing towards the edges.
